

YOUR NEW ZEALAND MANUFACTURED ORGANIC SOLUTION  
TO A CLEAN GREEN ENVIRONMENT

## HYGIENE UNIT

### The safe green solution to dealing with Hygiene Waste

- 🌿 The Hygiene Unit is a waste disposal system. Its unique cartridge system means no cleaning and less waste, saving costs and reducing energy use.
- 🌿 The outer cylinder (base) comes in two sizes, either in white or black finishes. While most customers prefer the wall mounted option, they can also be free standing with or without the plinth.
- 🌿 The cartridge consists of a cap, modesty flap and liner that contains biodegradable, antimicrobial and deodorising additives in the lid and inner cartridge. This reduces exposure to harmful bacteria including bloodborne pathogens. Making the system safe and customer friendly. This ensures your get a NEW modesty flap on EVERY service.
- 🌿 Waste contained within the cartridge providing protection for both the user and service personnel.
- 🌿 Unit uses biodegradable plastic additives and deodorising agents that are safe and friendly for the environment. The "green" hygiene units solution to reducing your carbon footprint.
- 🌿 **Both sizes of Hygiene Unit used for sanitary, nappy, colostomy bags and PPE waste disposal.**
