Long Drops

Where & How to use our Products

Problem

 These are a very real source of ground water pollution as well as having odours. There is usually too little moisture to allow biological action.

Solution

-  By adding Bio-Zyme Industrial with a large volume of water you help satisfy the moisture demand. Biological action will start to take effect immediately and odours will disappear
 -  Use 300ml Bio-Zyme Industrial to 1Ltr water and splash down and around hole covering contents of tank weekly.
 -  Use 60mls Bio-Zyme Industrial to 1Ltr of water to spray & wipe toilet seat and interior of cubide. Spray contents of tank when finished daily.
- or**
- Use 60mls Bio-Zyme Cleaner to 1Ltr of water to spray & wipe toilet seat and interior of cubide. Spray contents of tank when finished daily.
