\*Eco-Smart® polystyrene lids, plates, bowls and cutlery have been shown to biodegrade 24% after 216 days, under conditions that simulate a wetter biologically active landfill, using the ASTM D5511 standard test. Note that a stated rate of degradation does not mean the product will continue to decompose. Testing continues on all Eco-Smart® products to track the rate of biodegradation. All data will be made available on our website: [www.castawayfoodpackaging.com.au](http://www.castawayfoodpackaging.com.au)
