

NO RINSE SANITISER

SANITISER

Product Data

DESCRIPTION

NO RINSE SANITISER is a clear mild alkali liquid containing alkyl benzyl dimethyl ammonium chloride.

PRODUCT FEATURES

- High foaming.
- Kills mould.
- Very effective deodoriser.
- Can be used safely on all metal parts.
- NZFSA Approved. C 43

APPLICATIONS

NO RINSE SANITISER is a high foaming sanitiser designed for disinfecting and sanitising of food processing plants and equipment. When used at the recommended dilutions NO RINSE SANITISER will yield a near kill of:

Escherichia Coli 5934	Staphylococcus Aureus 147
Pseudomonas Aeruginosa 997	Proteus Vulgaris 996
Salmonella Typhimurium LT2	Listeria Monocytogenes 44
Streptococcus Faecalis 1106	Bacillus Subtilis 698
Candida Albicans 1212	Aspergillus Niger
Penicillium Italicum.	

DILUTIONS

Clean surface to be sanitised then dilute up to 1 – 130 (7.5ml/litre) for foaming or manual cleaning. Leave for 15 minutes minimum for sanitising then rinse off with water. Dilute 1 – 200 for a no rinse sanitiser. Dilute 1 – 200 for a foot bath.

Note: For information on safety, please refer to Safety Data Sheet.
