

Dear

I hope you enjoyed the lovely long weekend and indulged in the wonderful tradition of chocolate giving (and eating). I certainly did.

With the weather turning slightly cooler it's time to start making preparations for reducing the spread of coughs and colds through your staff and customers.

Last year we had a severe shortage of hand sanitiser and face masks due to the Swine Flu H1N1 pandemic. The H1N1 virus is still alive and has spread throughout the world. It is expected to hit again in New Zealand shortly. While most people are quite complacent about this virus now it still pays to protect yourself, your staff and your customers against the spread of all cold and flu viruses.

With this in mind we are promoting our D-Germ alcohol free hand sanitiser in the April specials.

We have also launched an [individual pandemic kit](#) and an [office/small business kit](#) with face masks, gloves, tissues and hand sanitiser.

This months topics:

- April Product Special
- Fun website links
- Interesting fact!

April Product Special

D-Germ is both alcohol free and fragrance free. D-Germ kills 99.99% of germs on your hands. It will not sting or dry out your hands. Benzalkonium Chloride is the active ingredient, and unlike alcohol sanitisers this has a residual effect and will continue to kill germs on your hands after application. As a foaming product you get more applications from a bottle than the same alcohol based sanitiser.

Apply to your hands, rub them together and D-Germ evaporates - no need for water or paper towels.

D-Germ 50ml portable bottle dispenses the sanitiser as a spray. With over 120 applications per bottle this is a very economical size sanitiser to slip into your purse or carry in the car. Refillable from our 2.5L refills.

50ml D-Germ \$5.50 + GST [BUY NOW](#)

D-Germ 500ml desktop bottle dispenses the sanitiser in a luxurious foam, only one pump will be required per hand wash. Over 700 applications per 500ml bottle. Refillable from our 2.5L refills.

500ml D-Germ \$9.15 + GST [BUY NOW](#)

Fun website link

Alcohol based hand sanitisers contain over 62% alcohol in them. While the teacher was out of the room these students lit a spiral of alcohol sanitiser!

Interesting fact! It is estimated that it costs New Zealand business around \$2 billion a year in staff illness, injury and absenteeism.

Have a fabulous April!

Kind Regards
Stephanie Lowe
