

Dear

February already! One month into the new year and everyone I have spoken to is feeling full of optimism for year 2010. Even the cicadas are out in full force today to celebrate.

**This months topics:**

- February Product Special
- Fun website links
- Interesting fact!
- Joke

**February Product Special**

Green-One rubbish bags (formally Greensac) were launched in October 2009. These multi-use bags are oxo-biodegradable, contain recycled plastic, are printed with water based inks, are made in New Zealand and are hard wearing and durable.

Oxo-biodegradable means the bags have an additive in them that will cause the product to completely break down in water, sunlight and landfill. After 18 months of use these bags will start to degrade, leaving no fragments, methane or harmful residues.

Green-one bags come in a range of sizes, from office bin liners, kitchen tidy bags, economy, drawstring and wheelie bin rubbish bags.

If you are interested in finding out more about why this plastic will degrade this [You Tube clip](#) is interesting and informative.

If you would like a sample of these bags we are happy to send you

one.

This month we are offering a special price on cartons of the following Green-One bags:

Office Bin Liners Carton 600 bags ~~\$65.00~~

February price \$61.00 + GST [BUY NOW](#)

Economy Rubbish Bags Regular Carton 250 bags ~~\$62.50~~ February price \$59.00 + GST [BUY NOW](#)

Fun website link

I came across this video prank that was very clever.

[You Tube video post on a prank where someone completely covered a co-workers office in toilet paper!](#)

Interesting fact!

Before toilet paper was invented the Romans used an 'L-shaped' stick with a sponge that was soaked in saltwater between use.

Joke

May your life be like a roll of toilet paper - long and useful!

Have a safe and prosperous February!

Kind Regards
