

Wow - The Green Living Show was a great success! It was fantastic to meet so many people who have ordered in the past and use products from our website - thanks for coming to say hi! A big welcome to all our new subscribers as well.

We made some great connections and had lots of positive feedback. The newsletter is late this month due to the number of follow ups we have had to do!

With the cold, wet weather setting in, spring cleaning is probably not on the agenda but you may be finding an increase of mould around the house. We have been using Oxygen Bleach to naturally remove the mould.

June Product Special

This month we are running a special on Oxygen Bleach.

100% sodium percarbonate, oxygen bleach can be used anywhere around the house that needs to be destained or deodourised. It is efficient, safe and economical. Oxygen bleach is non-toxic, environmentally safe, biodegradable and leaves no harmful by-products or residues that can harm the environment.

Interesting fact!

The average office worker in the United States uses 10,000 sheets of copy paper every year.

Thank you for your business, we truly appreciate it.
