

Dear Stephanie

This month hosts Global Handwashing Day - October 15th. Yes I was surprised to know there is a day every year to raise awareness for handwashing as well!

I have designed a poster for childcare centres to encourage children to wash their hands. You can download the poster yourself or if you would like me to send you a poster I will be more than happy to.

October Product Special

I am very excited to introduce a new product into our range.

Disbin is a discrete disposable bathroom wastebin.

Disbin sanitary disposal unit is an eco-friendly, low cost, biodegradable bathroom waste disposal bin.

No expensive contracts, just buy them as you need them and throw them out with your rubbish when they are full. Hang them on the wall or leave them sitting on the floor. Commercial grade deodoriser kills e-coli, staphylococcus, hepatitis B & C and deactivates the aids virus.

Made from 80% recycled materials, these offer a low carbon footprint alternative to commercial sanitary units. Available in 6Litre or 12Litre units.

This months special: Disbin 6Litre bin. Usually ~~\$9.50~~ + GST This month **\$8.50** + GST

Interesting fact!

Dr Charles Gerber, environmental microbiologist, studies germs and discovered that an ATM has more germs on it than a public restroom door. He found that in an office the areas with the most germs are telephones, keyboards, mouses and fax machines. Womens desks were the worst as they tend to eat their lunch there more than men do.

Have a fabulous October!

Stephanie Lowe
