

# INSTABUFF

## CLEANER MAINTAINER

### Product Data

#### DESCRIPTION

INSTABUFF is a red coloured liquid cleaner maintainer. A new concept in non build-up floorcare which cleans, disinfects and shines in one operation.

#### PRODUCT FEATURES

- Ensures no build-up and no permanent inclusion of dirt into the floor finish.
- Cleans and shines in one operation.
- Contains a bactericide.
- Shines to a slip-resistant deep gloss.
- Can be applied either by a mop-buff or spray-buff system.
- NZFSA Approved C 25

#### APPLICATIONS

INSTABUFF is mild and safe to use on Instashine and Instagloss floor coatings. May be used in conjunction with polymer dressings on quarry tiles, slate etc. It can be applied by either a mop buff, spray buff operation or automatic scrubbing.

#### DILUTIONS

- Mop Buffing: Dilute INSTABUFF 1:4 with water (approx 1 cup per 1 litre water). Mop the floor and allow to dry. Machine buff to a shine with either a yellow or red pad. (A polishing brush may be used on uneven surfaces eg. Quarry tiles etc).
- Spray Buffing: Use INSTABUFF neat. Using a spray bottle, spray a fine mist lightly on the floor. While still wet, machine buff to a brilliant shine using yellow or red buffing pad or polishing brush.
- Automatic Scrubbing: Dilute INSTABUFF 1:10 in the solution tank of the autoscrubber. Using a clean red pad or polishing brush, scrub floor and allow to dry. Machine buff to brilliant shine.
