

Welcome spring!

I visited the Auckland Home Show last week and it seemed that every second stall was promoting their products as being eco-friendly or biodegradable. Obviously this is a growing trend and customers are now getting more opportunities to buy 'greener' products. It's good to see!

Last month we bought on a range of Stoko Skin Care products. This range of soap and sanitiser has the Green Seal certification, their products are biodegradable, and don't contain solvents or any products that may harm the environment.

We have starter packs available - buy two softbottles and receive the dispenser FREE!

## **September Product Special**

This month we are running a special on the Stoko Estesol hand wash. This is a soap free skin cleanser that contains a skin conditioner and a less aggressive surfactant made up of sugar tensides.

Starter pack of 2 softbottles and dispenser Green Estesol - this month only \$54.00+ GST

## **Interesting fact!**

It takes 5-6 months for orange peel to decompose.

Thank you for your business, we truly appreciate it.
